Volume 143 June 1984

CONTENTS

Stirring by chaotic advection. HASSAN AREF *page* 1

Turbulent boundary-layer interaction with a shock wave at a compression corner. S. AGRAWAL and A. F. MESSITER 23

On modifications of the Zakharov equation for surface gravity waves. MICHAEL STIASSNIE and LEV SHEMER 47

Two-layer spin-up and frontogenesis. P. F. LINDEN and G. J. F. VAN HEIJST 69

Numerical calculation of decaying isotropic turbulence using the LET theory. W. D. MCCOMB and V. SHANMUGASUNDARAM 95

Roll-pattern evolution in finite-amplitude Rayleigh–Bénard convection in a two-dimensional fluid layer bounded by distant sidewalls. P. G. DANIELS 125

An experimental study of the mechanism of intermittent separation of a turbulent boundary layer. QUING-DING WEI and HIROSHI SATO 153

Stokeslet arrays in a pipe and their application to ciliary transport. N. LIRON 173

Third sound: the propagation of waves on the surface of superfluid helium with healing and relaxation. R. S. JOHNSON 197

Nonlinear convection in high vertical channels. C. NORMAND 223

Particle trajectories in nonlinear capillary waves. S. J. HOGAN 243

The dynamics of stretched vortices. JOHN C. NEU 253

Structure of a high-Reynolds-number turbulent wake in supersonic flow. J. P. BONNET, V. JAYARAMANT and T. ALZIARY DE ROQUEFORT 277

Shock structure near a wall in pure inert gas and in binary inert-gas-mixtures. B. SCHMIDT, F. SEILER and M. WÖRNER 305

Lunate-tail swimming propulsion as a problem of curved lifting line in unsteady flow. Part 1. Asymptotic theory. H. K. CHENG and LUIS E. MURILLO 327

Prandtl–Batchelor flow past a flat plate with a forward-facing flap. P. G. SAFFMAN and S. TANVEER 351

Monte Carlo simulation of coagulation in discrete particle-size distributions. Part 1. Brownian motion and fluid shearing. H. J. PEARSON, I. A. VALIOULIS and E. J. LIST 367

Monte Carlo simulation of coagulation in discrete particle-size distributions. Part 2. Interparticle forces and the quasi-stationary equilibrium hypothesis. I. A. VALIOULIS, E. J. LIST and H. J. PEARSON 387

Organized structures in a reattaching separated flow field. T. R. TROUTT, B. SCHEELKE and T. R. NORMAN 413

Organized structures in turbulent Taylor–Couette flow. A. BARCILON and J. BRINDLEY 429

Numerical predictions for laminar source–sink flow in a rotating cylindrical cavity. J. W. CHEW, J. M. OWEN and J. R. PINCOMBE 451

REVIEWS

Mécanique Aléatoire, by P. Kree and C. Soize 467

Vortex Flow in Nature and Technology, by Hans J. Lugt 468

CORRIGENDUM 471
